

Hotel Reservation System

Our project has 6 pages and does the following:

Page 1: sign in page

Page 2: lets the user to choose the country and city

Page 3: lets the user to choose the date of the reservation and how many adults and how many kids

Page 4: lets the user to choose if he wants a suite room or private villa or an economy room

Page 5: lets the user to choose the hotel he prefers

Page 6 : is the confirmation page then it sends the payment to your email
